

WORLDWIDE, WE ARE

You need local service, fast.

Endeka is a company in permanent evolution, geared towards responding efficiently to your needs.

We are developing fast, drawing even closer to your specific local needs thanks to our efficient regional network. We are also increasingly more responsive to your latest development deadlines; for example, thanks to the Endeka Lab Studio, we can now turn your request into a prototype in just 15 days.

We are passionate about our mission, priding ourselves on being at your service wherever you are in the world and providing innovative customized solutions, locally and to tight deadlines.

Challenge us.

Bertrand Repelin
CEO

Who we are:

- The Endeka group was established in early 2008, with the support of Pamplona Capital Management LLP and Endeka's own management team
- We benefit from more than 50 years of experience with Cookson and Johnson Matthey
- We place more than 600 staff members at your service
- The Endeka group focuses on supplying top-quality grades of Zircosil®, Minerals, Tin oxide, Colours, Frits and Glazes
- We have a worldwide presence, providing local service; we speak your language and respond to your local needs, fast.

Nature Friendly

Endeka incorporates a deep concern and respect for the environment into all its developments

Endeka is a global leader in Zircosil[®] and Minerals

Endeka is a global leader in the milling, micro-nising and calcination of zircon sand, boasting solid long-term relationships with major primary-grade zircon sand miners.

Our production capacities are strong in Asia, Europe and the Americas: we pride ourselves on being close to you in order to react quickly to your needs. We can also supply complementary minerals locally.

Contact us

for your own tailor-made solutions:

Endeka enhances the various properties of zircon sand to produce made-to-order Zircosil® grades for specific markets:

- Whitening / opacifying properties: the ceramic tile and sanitary / wellness health markets
- Refracting properties: precision investment casting, refractories, foundries

Endeka Lab Studio: your customized solution in just 15 days. **Challenge us!**

Have you ever dreamed of transferring your complex project to a fantastic team of engineers and designers in order to achieve an industrial solution, obtaining even the desired tile prototype?

And fast... say, in just 15 days?

The Endeka team will help you to stay up-to-date with market requirements.

Our Lab Studio is located in Sassuolo (Italy), working in close cooperation with the latest manufacturers of technology-based equipment.

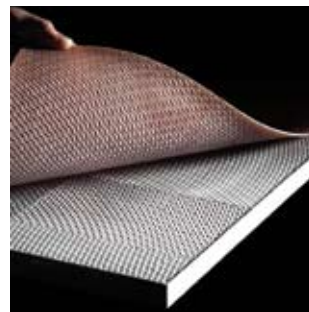

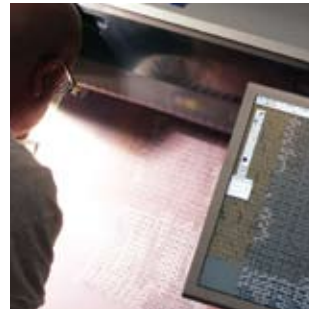

Our team of engineers and designers, using our first-class equipment, will turn your request not only into a virtual model but into a real tile prototype, in just 15 days.

Endeka offers the right glaze to fit your production tool, whether it uses conventional or cutting-edge technologies.

Our expertise covers all your needs, including Atomker®, Colorsint, Third Fire, Thermeco...
